

Please get with the times. XM and the ability to provide local content should be allowed.

I pay a fee to have XM. NAB nor the US Government should not have the right to censor what I pay and want to listen to. That is my right as a US citizen.

XM provides the variety and, more importantly, the QUALITY that I demand.

Times have changed. Technology has changed. NAB needs to change.

Think about it. NAB could have taken the chance as a group and launched the satellites to provide the service. But they did not. XM did.

Do not limit them.

And by no means, DO NOT LIMIT ME.

Thank you for your time.
